

Environmental Policy

TEIDE REFRACTORY SOLUTIONS understands that its environmental policy is focused on continuous improvement through efficient production processes, aimed at minimizing energy consumption, water usage, emissions to the environment, and waste, in order to protect health and safety at work as well as the natural environment.

It is considered essential to disseminate and communicate to the internal staff of the company, clients, suppliers, and other interested parties that to achieve and maintain this policy, it is based on the commitment to meet the following points:

- Comply with applicable regulations and legal requirements.
- Promote environmental training and awareness for our employees, suppliers, and subcontractors.
- Take into account the development of good environmental practices.
- Protect the environment in a sustainable manner by making proper use of resources and correctly managing waste during our industrial activity.
- Reduce, where possible, the production of unnecessary emissions within the operational environment, protecting the environment.
- Pursue continuous improvement by reviewing areas that need improvement and providing new solutions to environmental issues that may add value to society as a whole.
